Subject: RE: Tower Standard S2C2 presentation

I have asked Bristol to update the website with any new figures for the model discussion but have not received word yet that it is done. There will not be any new draft documents from Bristol before the presentation. They will submit another tech memo after the model is finalized and we are satisfied with that product. The tech memo will contain information from the final model.

I will ask Bristol about the upload of the model figures to the website.

Good Morning Sherry,

Our Management and Tribal Council has agreed to a technical coordination step put forward by the Office of Tribal and International Affairs Office. We are awaiting the next steps for this effort to proceed.

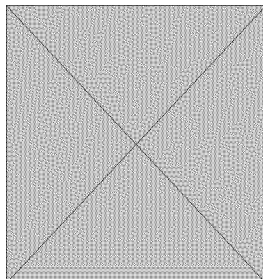

In advance of any presentation, we anticipate materials and files for review and preparation. If there are updated model files, please provide them. Also, please provide EPA contractor deliverables and reports.

Sincerely,

Kristen Hanson

Environmental Response Program Coordinator/ Environmental Specialist

Lac du Flambeau Tribal Natural Resource Department

Subject: Tower Standard S2C2 presentation

Hello Kristin and Dee,

We are hoping to schedule a presentation with you and EPA to see the S2C2 presentation the week of January 30, 2017.

This would be a great opportunity to start up our discussions again by looking at the data and having a visual depiction of what is occurring at Tower Standard.

We always start looking at schedules for this type of presentation by looking to see what dates the contractor is available. Bristol and S2C2 are available on January 30th. Could this date work for you two?

Sherry
